

Cybersecurity Services

What We Offer:

- Cybersecurity audit of the network, MFA, EDR systems, and update management
- Cyber hygiene and social engineering training for staff
- Backup strategy design and disaster recovery planning
- Preparation for ISO 27001 or SOC 2 certification (gap analysis, documentation, and ongoing support)
- Building a full ISMS (Information Security Management System) from scratch or auditing existing systems and policies

Cybersecurity Services Packages:

01 BASIC

For companies that are only starting on the path to cybersecurity, a basic analysis and starter tools are being provided.

02 STANDARD

For businesses that strive for a systematic approach — analytics, standards compliance, and audit readiness.

03 PREMIUM

Full security audit, including regulatory compliance, testing, training, and certification support.

Audit Services Include:

- 01 Information Security Checklist
- 02 Security Audit
- 03 Threat & Vulnerability Detection
- 04 Pre-ISO 27001/SOC Audit
- 05 Load & Stress Testing
- 06 Internal ISO 27001/SOC Audit
- 07 Support

Creating an ISMS

- 01 Compliance Checklist
- 02 Goal Definition & Requirements Gathering
- 03 ISMS Architecture Design
- 04 IS Risk Management Methodology
- 05 SoA (Statement of Applicability)
- 06 Procedure Development & Implementation
- 07 Internal Policy Review & Audit

Bonus* Package: Complimentary Kit

What We Offer:

- 01 Ten-point checklist — basic self-assessment based on ISO 27001:2022 (Chapters 4–10)
- 02 One sample policy (of your choice), such as an Access Control Policy or Acceptable Use Policy
- 03 Short text instructions — how to go through the checklist and adapt the policies to your company's internal rules

*This complimentary kit is available exclusively to clients who have purchased any of Devtorium's services.
